SSE Network Services

IT Projects Sitting on the Backburner? Your Team May Keep You Going, We'll Help Get You Ahead

We know how your IT team can get caught up just putting out fires to keep your daily operations going. Often times it seems there is not enough time in the day to get the bigger projects done. If you just need assistance with a technology project, we offer a variety of technology project services. We can augment your team of resources or come in and own the project from start to finish. We can assist your business with the following:

NETWORK INFRASTRUCTURE UPGRADES

We will plan, design and deploy new or upgraded computer systems, software and equipment with little to no disruption to your office. This may include:

- Microsoft Windows, Exchange or Office
- Telecommuting and Remote Access Solutions
- Mobile Telecommunications

DATA MIGRATIONS

SSE has proven processes to efficiently move network accessible data to a new location. If needed, we can install the new hardware for you as well and then migrate data from the old server to the new one.

SERVER VIRTUALIZATION

SSE has in-depth experience deploying virtual solutions to allow a single piece of server hardware to host up to 15 virtual servers – a clear cost advantage for businesses.

TECHNOLOGY RELOCATION SERVICES

When relocating to a new office, minimizing downtime is critical. Moving computer networks and PCs presents a special challenge. SSE can assist you with the following:

- New Site Planning
- Site Walkthroughs (with cabling vendors, etc.)
- "The Big Day" - Moving, setting up, and installing

Other Services:

- **Managed IT Services**

  We offer all-inclusive support to effectively manage your business' IT operations.

- **Cloud-Based Services**

  We offer a variety of cloud services to increase flexibility and scalability for your business.

- **IT Consulting Services**

  As your trusted IT advisor, we seek to understand your business and ensure your investments in technology support your business objectives .

- **IT Security Services**

  We offer a number of security measures to protect your business from cyber threats and security consulting to uncover network vulnerabilities.

- **IT Relocation Services**

  We help plan and implement your technology move for a smooth transition to your new site.
