

SSE has been serving the federal government since 2002. Leveraging over 30 years of commercial experience, SSE's capabilities in network services and training solutions have translated directly to serving the public sector as both a partner to prime government contractors and as a direct service provider.

OUR EXPERTISE:

Training Solutions

At SSE, we provide complete training systems for entities in the public sector. We can help guide your team through the process of defining an upfront strategy to implementing a complete customized solution.

Training Services:

- Front End Analysis
- Courseware Development
- Revision and Maintenance

PAST PERFORMANCE:

Training Solutions:

Maritime Patrol and Reconnaissance (MPR) Aircrew Training Systems Curriculum Revision and Maintenance

Prime Contractor: SSE

Provided revision and maintenance for unclassified and classified training in support of P-3/P-8 Maritime Patrol and Reconnaissance Weapons School (MPRWS).

E-2/C-2/Landing Signal Officer (LSO), Naval Aviation Training Systems Curriculum Revision and Maintenance

Prime Contractor: SSE

Provided revision and maintenance for courseware and instructional materials in support of E-2/C-2/ACTS/LSO School.

Electronic Classrooms:

P-8 Maintenance Training Electronic Classroom (METC)

Prime Contractor: SSE

Naval Air Station - Jacksonville, FL

P-8A MTEC is the computer-based training system that supports P-8A classroom training activities conducted at Naval Air Station (NAS) Jacksonville, Florida. SSE procured equipment and assembled the MTECs; conducted testing and evaluation, including Joint Final Inspections, Physical Configuration Audits, and provided training documentation.

Training System Electronic Classrooms

Prime Contractor: Large Aerospace Company

Naval Air Station - Jacksonville, FL

Subcontractor: SSE

Responsible for the development, integration, testing, production, installation and post-delivery support of Training System Electronic Classrooms at the Integrated Training Center at the Naval Air Station in Jacksonville, Florida. Classrooms included instructor stations, interactive display systems, classroom control capabilities, associated network components, and 10 to 20 student workstations integrated with the local area network in the Training System Support Center.

Consulting/Facilities Management:

Large Aerospace Company

Subcontractor: SSE

Provided labor, facilities, computing equipment/software to update/create unclassified and classified (Secret) courseware for both the aircrew and maintenance audiences on various aircraft platforms. SSE was responsible for supporting the development and fielding all Computer-Aided Instruction and Interactive Courseware (ICW). The ICW level II courseware allowed the students to interact as they would in simulators and aircraft. The secure courseware development facility was designed and built to meet all guidelines set forth in the National Industrial Security Program Operating Manual (NISPOM) Section 8.
